Project Documentation Phase

Project Title: ComicCraft – AI Comic Story Creator using Gemini Models

College Name: Government Arts and Science College, Manur.

College Code: MSU142

Department: B.SC Computer Science

Team ID: 6ab214cd186ba30941b6117f

Team leader : Swetha D NMID:DC7909570E81C629D5840AFD7E3314CD

Team member : Santhi S NM ID:3A2360143DF92A195DF45E8B245C0012

Team member : Jayaabitha A.S NMID:AAEE35007C90E8898C44BEBE43775768

1. Introduction

ComicCraft is an AI-powered web application that creates comic stories from user prompts using Google Gemini models.

2. Problem Statement

Creating engaging comic stories manually takes time and creative effort. ComicCraft automates story generation with AI.

3. Objectives

- Generate comic stories from text prompts.
- Support multiple genres.
- Create panel-wise dialogue and narration.
- Provide a simple user interface.

4. Scope

The system is intended for students, writers, and comic enthusiasts to quickly create storyboards.

5. Technology Stack

Frontend: React + Vite
Backend: Node.js + Express
AI: Google Gemini API
Styling: Tailwind CSS

6. Functional Requirements

User enters prompt, selects genre and panel count, Gemini generates structured comic JSON, and the UI displays comic panels.

7. Non-Functional Requirements

Fast response, responsive design, secure API key handling, and user-friendly interface.

8. System Architecture

User → React Frontend → Express Server → Gemini API → Comic JSON → Frontend Display

9. Expected Outcome

A working AI comic generator capable of producing creative multi-panel comic stories.

10. Conclusion

ComicCraft demonstrates how generative AI can assist storytelling through an interactive comic creation platform.
